Call for Papers

Many people agree that the global economy is threatened by rising inflation, slow economic growth, high cost of living, rising unemployment rate and severe risk of fragmentation. That is why, we acknowledge the fact that the economist profession has been put under a lot of pressure due to the uncertainty and polycrisis that we face nowadays. In these circumstances, we invite you to be pragmatic, collaborative and open in keeping the global economy integrated for a the better world.

For this reason, dear bachelor and master degree students, both national and Erasmus incoming students, we invite you to attend the **Anniversary Edition** of the **International Economic Conference of Sibiu (30th IECS Edition, 2023) - Student Section**, to debate your research ideas in the current economic environment.

IECS Students event will take place on

May 25th 2023, onsite

No participation fee.

For further information please visit iecs.ro/student section
